

## Appendix A

1. (Amended) A replacement package for the repair of a damaged ligament comprising:

a graft comprising a non-autologous graft material having a proximal end and a distal end, a first set of sutures attached to the proximal end, and a second set of sutures attached to the distal end,

wherein the graft is preserved and provided in sterile packaging.

12. (Amended) A prepackaged sterile replacement ligament comprising:

a non-autologous graft comprising a bundle of graft material strands, the bundle having a proximal end and a distal end, a first set of sutures securing a first bone plug to the proximal end, a second set of sutures securing a second bone plug secured to the distal end,

wherein the graft is preserved and provided in sterile packaging.

35. (Amended) A kit for replacing a damaged ligament in a patient comprising a sterile packaged prepared non-autologous replacement ligament having pre-attached sutures for aiding in insertion into the patient, and a graft fixation device.

37. (New) The replacement ligament of claim 12, wherein the graft is an allograft.

38. (New) The kit of claim 35, wherein the replacement ligament is an allograft.

39. (New) The kit of claim 35, further comprising a plurality of the sterile packaged prepared non-autologous replacement ligaments wherein the ligaments are provided in a variety of lengths.
